WIRELESS LINKS FOR DIRECTING STUDIO PRODUCTIONS. [1963] 19p
Order from SLA $1.60 TT-64-14627

Trans. of [die] Kino-Technik (Germany) 1962 [v. 16] no. 2, p. 37-41. (Abstract available)

DESCRIPTORS: *Intercommunication systems, *Radio communication systems, Low frequency, Inductance, Radio transmitters, Radio receivers,

Wireless links are finding an increasing use in modern studios where they provide one-way audio connections from the direction centers to the principal groups of personnel. For technical reasons, as well as because of official regulations, the system suitable for this purpose is primarily that operating on the induction loop principle. This paper describes a multichannel device and considers in detail the design of the sender and receiver. (Author)
